Farm Accounts

What is the Purpose of Farm Accounts?

Farming is a business and therefore should keep proper and suitable records. Farm accounts are prepared in order to:

- Establish the profit or loss of the farm
- · Establish the value of the farm
- Its required for loans and EU grants
- To facilitate planning and budgeting
- To make comparison between previous years
- To present accounts to the Revenue Commissioners
- Establish the effectiveness and performance of each section of the farm

Farmers should prepare the following books and accounts:

- An analysed cash book or an analysed receipts and payments account
- Enterprise analysis accounts
- A general profit and loss account and balance sheet

Let's take a look at an example.

Q13.1

John and Bernie Watson run a mixed farming business and provided the following information for the month of February 2012.

	Payment	S		Lodgement s						
Feb-04	Cat t le	€	29,000.00	Feb-04	Milk	€	2,400.00			
Feb-06	Dairy wages	€	250.00	Feb-06	Sheep	€	10,000.00			
Feb-09	Sheep	€	14,000.00	Feb-07	Cat t le	€	23,000.00			
Feb- 10	Drawings	€	300.00	Feb- 10	Single payment	€	3,800.00			
Feb- 10	General wages	€	260.00	Feb-22	Rent: Conacre	€	960.00			
Feb- 12	Seed	€	400.00	Feb-24	Crop sales	€	22,000.00			
Feb- 13	Dairy wages	€	250.00							
Feb- 15	Repairs	€	220.00							
Feb- 18	Feeding: sheep	€	422.00							
Feb-23	Gneral wages	€	260.00							

You are asked to:

 Draw up an analysed receipts and payments account for the months of February. On February 1, 2012 the Watsons had a bank balance of €4,100

	Analysed Receipts and Payments Account [Receipts]														
Dat e	Det ails		Milk		Sheep		Cat t le		Grant s		Crop		Rent		Tot al
Feb-01	Balance c/d													€	4,100.00
Feb-04	Milk sales	€	2,400.00											€	2,400.00
Feb-06	Sheep			€	10,000.00									€	10,000.00
Feb-07	Cat t le sales					€	23,000.00							€	23,000.00
Feb- 10	Single payment							€	3,800.00	4.				€	3,800.00
Feb-22	Rent: Conacre					A						€	960.00	€	960.00
Feb-24	Crop sales									€	22,000.00			€	22,000.00
	Tot al received	€	2,400.00	€	10,000.00	€	23,000.00	€	3,800.00	€	22,000.00	€	960.00	€	66,260.00
Mar-01	Bal b/d													€	20,900.00

	Payment s																		
Dat e	Det ails		Sheep	Dair	y wages		Cat t le	I	Orawings	Gene	ral Wages		Seed	Sh	eep feed	S	undries		Tot al

Feb-28	Bal c/d																	€	20,900.00

Some Theory

What are Enterprise Analysis Accounts?

An enterprise analysis account is a trading, profit and loss account for a particular enterprise. The balance, namely the gross profit and contribution of their enterprise is transferred to the general profit and loss account of the farm. Dividing up some expenses, such as general wages or interest might be necessary.

The figures used in the enterprise analysis account are the analysis totals taken from the receipts and payments analysis columns. When separate enterprise analysis accounts are used, it is necessary to prepare a general profit and loss account. Into this general accounts, the profit or loss of each enterprise is transferred. A balance sheet should then be prepared in the same way as for any other business.

Terms associated with farm accounts

- Single payment: This is a payment introduced in 2005 and replaces a number of old subsidies. Under this scheme each hector of land has specific entitlements.
- Conacre: This is a rental payment made by a farmer to a landowner for the use of their land. Payment can be made yearly.
- Disadvantaged Areas Compensatory Allowance Scheme: These are payments made to farmers in disadvantaged areas. They are partly funded by the EU.

 Rural Environment Protection Scheme: Payments are made to farmers to protect the farm environment and it's funded by the EU. It can be a significant source of income to non-intensive farmers.

Valuation of Stock

Stock is valued in the same way as the stock of any business i.e. at the lower of cost and net realisable value. The cost of maintaining livestock is added to the purchase price for valuation purposes and the cost of sowing and harvesting is added in the case of crops for valuation purposes.

How is the farm produce that consumed by the farmer treated in the accounts?

- Debit drawings account
- Credit sales account
- Sales account is credited rather than the purchases account because farm produce consumed by the farmer is not purchased but produced by him/her
- The drawings account is transferred to the capital account i.e. debit capital account.

Consumption of Farm Produce

Farm produce consumed by a farmer is treated as drawings. Then drawings account is debited and the particular sales are credited. The sales account rather than the purchases account is adjusted because farm produce is produced rather than purchased.

Let's take a look at an example

Q13.2

From the figured in the receipts and payments book from Q13.1, prepare an enterprise analysis account for "cattle and milk" for the month of February. The following information should also be taken into account.

- a) Milk used by the family during Feb was €220
- b) Value of cattle at cost on 1/2/2012 was €110,000
- c) Value of cattle at cost on 31/12/2012 was €115,000
- d) Amount of single payment applying to cattle and milk was €1,000

	34,980 (2)
	1,200 (1) 2,100 (1) 2,320 (4) 5,040 (1)

d)

To find out the profit of the farm

To find out the net worth of the farm

To find out the profit of each section of the farm

To back up applications for grants and bank loans To facilitate planning/budgeting

Workings

1.	Interest - 18 months interest	=	$6\% \times 1.5 = 9\%$		
	109%	=		16,350	
	9%	=		1,350	
	Interest for year 2005	=		300	
	Less Drawings			<u>60</u> .	240
2.	Milk sales			28,000	
٠	Add due 31/12			1,800	
	Less due 1/1			(2.400)	27,400
3.	Fertiliser			3,000	
	Add due 31/12			<u>400</u>	3,400
4,	Veterinary fees			1,750	
	Less VHI			(650)	1,100
5.	Investment Interest			600	
	Interest due			<u>600</u>	1,200
6.	Light Heat and Fuel			3,400	
	Add stock 1/1			800	
	Less due 1/1			(400)	
	Less stock 31/12			(900)	
	Less drawings (20% of 2,900)			(580)	2,320
